

Curriculum Vitae Ludwig A. Hothorn

Date & Place of Birth May, 17th 1949 in Gera

Citizenship Germany

Education

1967 - 1971 Technical University of Dresden
(HS-Ing.) (Chemical Engineering)
1971 - 1974 Technical University of Dresden
Dr.-Ing. (Thesis: Mathematical Modelling)
1978 - 1980 Statistics; University of Freiberg (postgraduate)
1982 - 1988 Martin Luther University of Halle (external)
Dr.sc.nat.
(Thesis: Multiple Comparison Procedures in Dose-Response Relationships)
1991 Martin Luther University of Halle: Dr.rer.nat.habil
1992 Certificate: Biometry in Medicine by German Region of IBS

Societies The International Biometric Society (IBS)
Honorary Member of Deutsche Region (2017)

Society Appointments

- Council Member, Society of Biomathematics and Biophysics (1986-1990)
- Head of the working party 'Bioassay' (in the Society of Biomathematics) (1982 -1990)
- Head of the ad-hoc working group 'Statistical methods in preclinical research (German Region of Biometric Society) (1991 – 1997)
- Vice speaker of the AG Pharmazeutische Forschung (German Region of Biometric Society) (1993 – 1997)
- Speaker of the AG Multiple Methods (German Region of Biometric Society) (1997-2000)
- Council member, International Biometric Society (2002-2009)
- Council member, German Region of the International Biometric Society (2004-2006)
- Vice-President German Region of the International Biometric Society (2006-2007)
- President German Region of the International Biometric Society (2007-2009)
- Vice-President German Region of the International Biometric Society (2009-2010)

Sabbaticals 1998 Department of Epidemiology and Biostatistics, UCSF, USA
2003 Department of Biostatistics, University of Aarhus, Denmark
2009 Scripps Genomic Medicine, La Jolla, USA
2013 Medical University of Vienna, Austria

Research Interests

- Statistical Methods in Dose-Response Analysis, with applications in Biology, Genetics, Agriculture, Toxicology, Pharmacology and Medicine
- Order-restricted Tests
- Multiplicity Issues
- Statistical Methods in Life Sciences
- Statistical Methods in quantitative Genetics
- Computational Statistics using R

Publications in peer-reviewed international journals

Project Peer Reviewer

- DFG, NSF, OECD

Talks (since 2012)

- *Utrecht University Seminar January 2012 Multiple testing versus model selection procedures under order restriction*
- *Biometr. Kolloq Berlin 2012 Model selection procedures under order restriction- an alternative to related multiple test procedures?*
- *Nonclinical Statistics Conference Potsdam 09/2012 LOAEL Identification by Model Selection Procedures Under Order Restriction (with Kuiper and Gerhard)*
- *Berliner Biometrische Kolloq (November 2012) Auswertung toxikologischer Studien mit dem Williams-Trendtest für verschiedenste Endpunkte*
- *University of Copenhagen (February 2013) Multiplicity-adjusted p-values versus simultaneous confidence intervals- a biostatistical perspective*
- *Nordic Biometric Conference Stockholm (June 2013) What do the two different problems have in common? Identifying the best plant clone/mutant. Are Piedmont pupils better than others in CA? Multiple comparisons with the grand mean*
- *MCP2013 (July 2013, Southampton) MCP's for non-Gaussian distributed endpoints- using R*
- *Medical University of Vienna (October 2013) User-defined contrasts within multiple contrast tests- case studies using R*
- *Styer Biometric Section, Graz (October 2013) Multiple comparisons for non-Gaussian endpoints-using R*
- *Paris-Lodron Universität Salzburg (Januar 2014) Multiple testing by multiple contrasts*
- *EIP Conference Lisboa (February 2014) Cutpoint estimation assuming a mixing distribution within the mixed model*
- *University of Bremen (July 2014) Order restricted inference: multiple contrast tests vs. model selection*

- *Nonclinical Statistics Conference Brugge (October 2014)* ADA Cutpoint estimation using R: assumptions, solutions and problems
- *Medical University of Vienna (November 2014)* Quality ranking
- *Nordic Biometric Conference Reykjavik (June 2015)* Overview on different multiplicity adjustments- using R
- *Wiener Biometrische Sektion. Medical University of Vienna (November 2015)* Simultaneous inference using multiple marginal models
- *Dagstat Göttingen (March 2016)* Simultaneous testing on different factors/ covariates: from Bonferroni inequality to multiple marginal models
- *Agrostat Lausanne (March 2016)* Proof of safety for a new variety/ product relative to a common-used one for multiple endpoints
- *Nonclinical Statistics Conference Cambridge, UK (October 2016)* Tutorial Dose-response analysis considering dose both as qualitative factor and as quantitative covariate
- *Internat Workshop on Multiple marginal Models (Hannover (December 2016)* Multiple, different-scaled, endpoints
- *Berlin Biostatistics Workshop (December 2016)* Simultane und selektive Inferenz-Ausweg aus dem p-Wert Dilemma?
- *Brussels (July 2017)* UseR! Key note: Dose-response analysis in toxicology and epidemiology: considering dose both as qualitative factor and quantitative covariate- using R
- *CEN Vienna (August 2017)* Dose-response analysis with multiple endpoints: the Tukey trend test based on multiple marginal models

Supervision of thesis

- H.-F. Koch (1996) *Teststrategien für die „many-to-one“ Versuchsanlage im Falle dichotomer Ereignisse*. Dissertation Universität Hannover (1)
- M. Neuhäuser (1996) *Trendtests bei a priori unbekanntem Erwartungswertprofil*. Dissertation Universität Dortmund (2)
- B. Brandt (1996) *Trendtests für location-scale Alternativen*. Dissertation Universität Hannover (3)
- M. Reit (1998) *Internetbasierte Lernsysteme zur Unterstützung der biostatistischen Ausbildung im Gartenbau*. Diplomarbeit Universität Hannover.
- M. Krämer (1998) *Multiple Vergleichsverfahren in ausgewählten gartenbaulichen Versuchen*. Diplomarbeit Universität Hannover
- F. Bretz (1999) *Powerful modification of Williams' test on trend*. Dissertation Universität Hannover (4)
- (D. Hauschke (1999) *Statistische Aspekte von Sicherheitsstudien*. Habilitationsschrift, Universität Dortmund)
- M. Weichert (2000) *Robuste Mittelwertvergleiche mit gartenbaulichen Anwendungen*. Dissertation Universität Hannover (5)
- D. Seidel (2000) *Trendtest für geordnet kategoriale Daten bei sehr kleinen Fallzahlen*. Dissertation Universität Hannover (6)
- C. Schratz (2001) *Simultaneous tests and confidence intervals for experimental agriculture designs*. Diplomarbeit Universität Hannover
- D. Gehrling (2002) *Biostatistische Methoden zur Schätzung des Stichprobenumfangs bei der Qualitätskontrolle von Saatgut*. Diplomarbeit Universität Hannover
- E. Biesheuvel (2002) *Many-to-one comparisons in stratified designs*. Dissertation Universität Hannover (7)
- R. Westphal (2002) *Nichtparametrische multiple Kontrasttests für rechtszensierte Daten in klinischen Dosisfindungsstudien*. Diplomarbeit Universität Dortmund
- A. Baumgart (2002) *Fallzahlbestimmung und Versuchsplanung für ausgewählte gartenbauliche Anlagen* (Diploma Thesis University of Hannover, 2002)
- D. Ma (2004) *Small Sample inference for the two-sample design*. (Master thesis, University of Hannover 2004)
- F. Schaarschmidt (2005) *Binomial group testing – Design and Analysis* (Diploma Thesis University of Hannover, 2005) (8)
- G. Dilba (2005) *Simultaneous Inference for Ratios of Location Parameters*. Dissertation Universität Hannover (9)
- C. Frömke (2005) *Relevance shifted tests for high dimensional data with small sample sizes*. Dissertation Universität Hannover (10)
- D. Gerhard (2006) *Poisson confidence intervals for testing the equality of abundance data in generalized linear models* (Diploma Thesis)
- M. Sill (2007) *Approximate confidence intervals and tests for binomial proportions and poly-k estimates* Msc Thesis Leibniz Universität Hannover
- Menke, S. (2007) *Einfluss von Neem Azal-U und Neem-Pellet auf *Trialeurodes vaporariorum* und *Encarsia Formosa* unter besonderer Berücksichtigung der biostatistischen Bewertung der Versuchsdaten mittels Generalisierter Linearer Modelle*. Msc Thesis Leibniz Universität Hannover
- F. Schaarschmidt (2008) *Marginal and simultaneous confidence intervals for abundance data with applications to safety assessment of non-target species*. Dissertation Leibniz Universität Hannover (11)
- M. Hasler (2009) *Extensions of multiple contrast tests*. Dissertation Leibniz Universität Hannover (12)
- X. Mi (2009) *Model Selection Procedure with Familywise Error Rate Control for Binomial Order-Restricted Problems* Dissertation Leibniz Universität Hannover (13)
- J. Kruppa (2009) *Simultaneous confidence intervals for fixed effect parameters in a linear mixed model*. Msc Thesis Leibniz Universität Hannover
- A. Kitsche (2010) *Incorporation of historical data in the statistical analysis of toxicological bioassays*. Msc Thesis Leibniz Universität Hannover
- Schmidt, M. (2010) ["Multiple comparisons of populations based on genetic marker data"](#) M.Sc. Thesis
- D. Gerhard (2010) *Simultaneous small sample inference based on profile likelihood* Dissertation Leibniz Universität Hannover (14)

- M. Sprengel (2012) *Analyse kategorialer Daten mit speziellen Focus auf simultane Konfidenzintervalle*; Msc Thesis Leibniz Universität Hannover
- P. Pallmann (2012) *Two-sample tests and multiple contrast tests of several diversity indices* Msc Thesis Leibniz Universität Hannover
- A. Garder (2013) *Application of model selection procedures in order-restricted B-spline regression models*. Msc Thesis Leibniz Universität Hannover (with D. Gerhard)
- A. Kitsche (2014) *Evaluation of interaction effects in two-factorial designs by simultaneous confidence intervals in the cell means model*. Dissertation Leibniz Universität Hannover (15)
- P. Pallmann (2016) *Multiple Contrast Tests with Repeated and Multiple Endpoints, with Biological Applications*. Dissertation Leibniz Universität Hannover (16)
- H. Domes (2016) *Validity of Confidence Intervals in Case of Model Selection Uncertainty* Msc Thesis Leibniz Universität Hannover
- F. Schaarschmidt (2016) *Simultane Konfidenzintervalle für multiple Vergleiche - Ansätze für nicht Gauß-verteilte Daten und Inferenz in linearen Modellen* Habil Leibniz Universität Hannover

Funded research projects

- 1995-1998 *Analysis of score data (Bonituren) in dose-response studies on herbicides* (BASF AG)
- 1997-1998 *The relevance of simple potency grading in carcinogenic classification based on animal data* (Federal Ministry of Health, bgvv)
- 1998 *Stratified trend tests for dichotomous endpoints* (Sabbatical University of California at San Francisco) (Volkswagenstiftung Hannover)
- 2000 *Validation and interlaboratory comparison of an immunotoxicity study* (Federal Ministry of Health, bgvv)
- 2001 *Sub-group analysis with error control*. (Solvay Corp. Weesp, The Netherlands)
- 2001 *Statistical methods for the purity proof against GMO's* (KWS AG, Einbeck)
- 2001-2002 *Statistical analysis of in-vitro validation studies INVITROSTAT* (European Community, Research Centre Ispra, Italy, Contract no. 17159-2000-11F1ED ISP DE , project leader)
- 2002-2005 *Simultaneous inference for ratio's* (DFG, No. BR2002/1)
- 2003 *Trend test for exposure studies* (VW-Stiftung for sabbatical stay at University of Aarhus)
- 2004 International Biometric Society Council, Cairns Australia (sponsored by DFG)
- 2005 - 2008 *Biometrische Methoden zum quantitativen Sicherheitsnachweis für Nichtzielorganismen, Resistenzfaktoren sowie spezifische Inhaltsstoffe beim Anbau gentechnisch veränderter Pflanzen im Freilandversuch* (Federal Ministry of Education and Research, bmbf)
- 2006 *Panel member on food additives, flavourings, processing aids and materials in contact with food (AFC) – working group on Aspartame* (European Food Safety Authority, Parma, Italy)
- 2007 EU-project: ECVAM JRC April "Quality assessment and novel statistical analysis techniques for toxicological data" ; Lot 2: ANOVA technique for ratios , No. 2006/S 237-252824
- 2008 - 2014 EU project No.201619 "ESNATS—Embryonic Stem cell-based Novel Alternative Testing Strategies" (FP7-HEALTH-2007-A) Part LUH Institute of Biostatistics
- 2010-2014 DfG Projekt (DfG HO168719)"Simultane Konfidenzintervalle für nichtparametrische Effekte in faktoriellen Modellen"
